

NORDENIA U.S.A.

Paper or Plastic? ***Easy Answer:*** ***FlexZiBox®***

Nordenia's sustainable GR-8 FlexZiBox® plastic packaging delivers more for your money compared to paper multiwall solutions. It's greener, requiring less energy to make, releasing fewer greenhouse gasses, and using far less space in landfills. And at a very affordable price point. Need more reasons to switch? Add its superb print quality and durability. Then ship it for less. No wonder companies that care about the environment and want the very best product presentation trust their packaging to Nordenia.

FlexZiBox® THE SMART PACKAGING UPGRADE

How do you stand out from the competition? It's easy with Nordenia's FlexZiBox packaging, the cost-effective way to upgrade your current product line-up and achieve sustainability.

The innovative flat-sided design of FlexZiBox provides both the convenience of a bag and stacking capabilities of a box. And

only FlexZiBox offers standing options like a convenient E-Z pour spout, zip closures to keep contents fresh, and attachable handles for pouring and lifting.

Beautiful and Tough

Superior print quality yields exceptional exposure and standout in the retail environment. And because of its flexible nature and thin but extremely durable materials, FlexZiBox packages can be packed close together on pallets, allowing for fewer shipments, and less spoilage – which equates to time and money savings for you.

Better for Today and Tomorrow

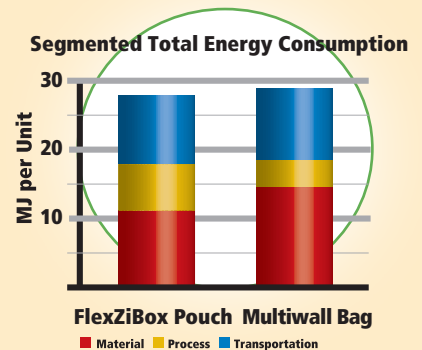

Nordenia's GR-8 line is the culmination of a concentrated effort to reduce, recycle, and renew our planet's resources through innovative manufacturing processes and globally responsible business practices. Whether you're in the pet, lawn and garden, or human consumable industries, Nordenia has a packaging solution that's right for you. With consumers looking for alternatives to non-sustainable products, Nordenia's GR-8 line is right for now and the future.

ADVANTAGES OF GR-8 PACKAGING OVER MULTIWALL BAGS†

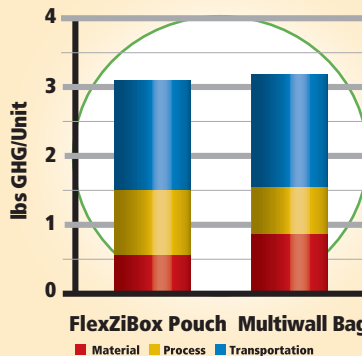

LESS Energy Consumption

FlexZiBox consumes less energy than the standard multiwall product, not only from material savings, but also pallet and shipping efficiencies.

Segmented Total Greenhouse Gas Releases

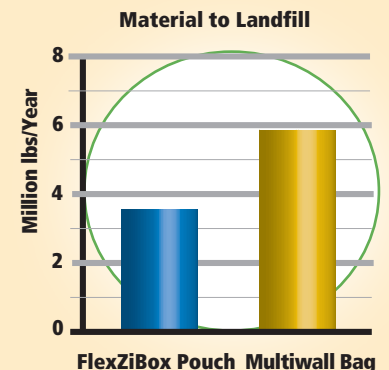

LESS Greenhouse Gas Release

During the creation and production of the FlexZiBox, the packaging manufacturing facility uses less energy to produce and assemble, resulting in less greenhouse gas emissions.

LESS Landfill Use

FlexZiBox uses less materials than a multiwall bag, so when it comes to disposing of the bag, your consumers can be reassured that it takes up far less space in the landfill.
